

toSeniors : Contacts app

Graphic mock-up of the user interface of the Conatcts app

For the design of the app the Google design guidelines were followed in order to develop an app compatible with the aesthetic and functional standards of Stock Android.

This document has been set up to describe precisely the user journey in contacts app. (additional fixes may needed during prototyping stages)

Font:

Roboto

Headline	Regular 24sp
Title	Medium 20pt
Subheader	Regular 16pt
Body 2 / Menu	Medium 14pt
Body 1	Regular 14pt
Caption	Regular 12pt
BUTTON	MEDIUM 14PT

Light theme default type color	Primary	#000000	87%
Default light bg: Google Grey 200, #EEEEEE	Secondary	#000000	54%
	Disabled	#000000	38%
Dark theme default type color	Primary	#FFFFFF	100%
Default dark bg: Google Grey 900, #212121	Secondary	#FFFFFF	70%
	Disabled	#FFFFFF	30%

The standard font size menu in Google Android is Roboto regular 14. The app uses as a default Roboto Regular 20. During zoom out the font is Roboto Regular 12

\*Important : font size 22 Medium or 20 Medium should be prototyped as well.

colours:

The app makes use of two different material palettes : **indigo blue** and **pink** along with their hues

layout and components :

the layout and the components of the app make use of the exact guidelines of Google's material design guidelines

resources can be found : <https://www.google.com/design/spec/material-design/introduction.html> and here: <http://developer.android.com/design/patterns/pure-android.html>

notes

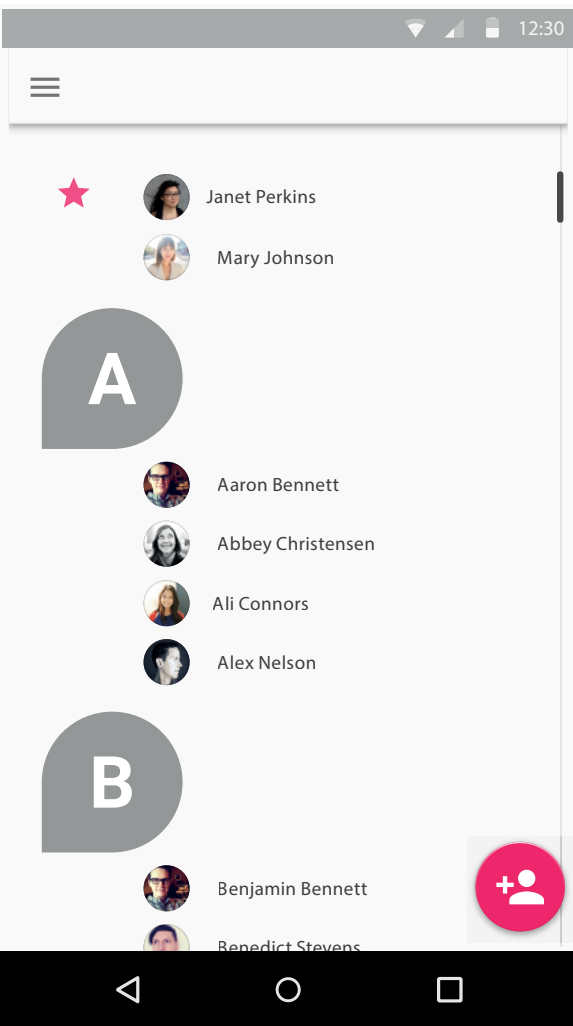

an additional screen will be added to show the edit contact additional options

contacts app: search

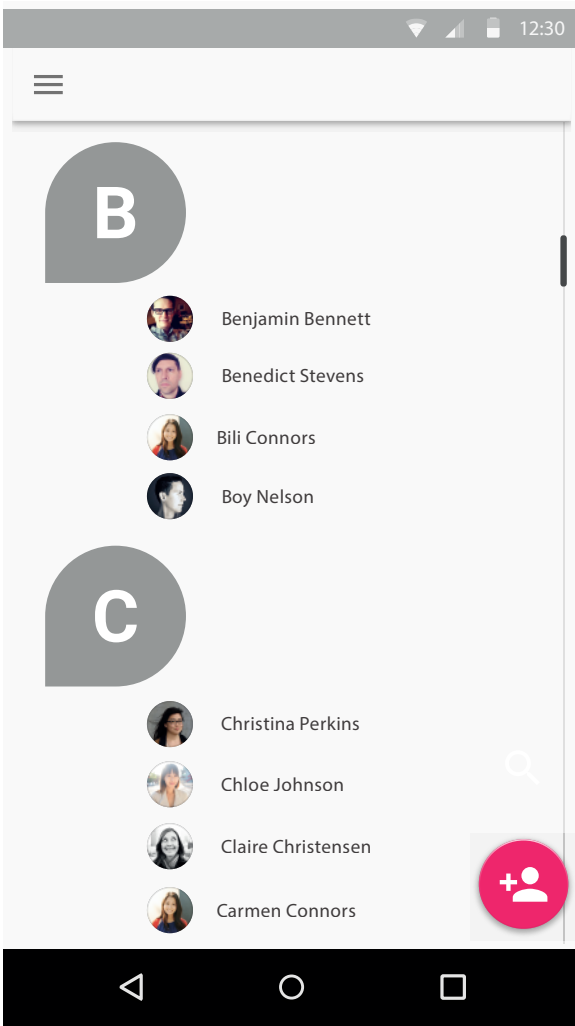

default screen of contacts  
asterisk contacts denote most used and recent contacts

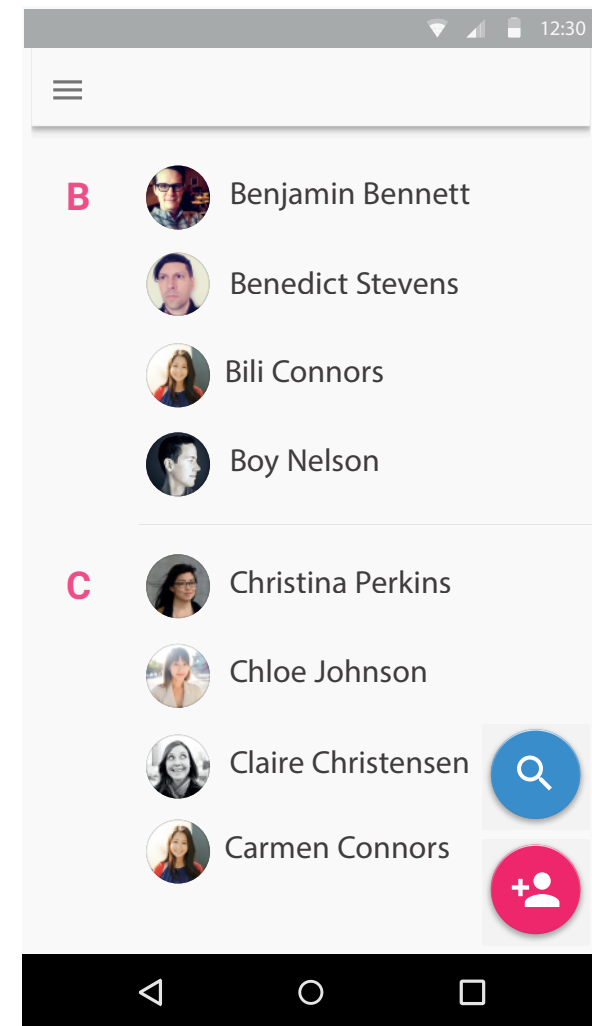

the app uses teo floating buttons for the main functions of "search" and "add contact"

pressing the search key  
contacts zooms out and the focus is given on Capital letters of the catalogue

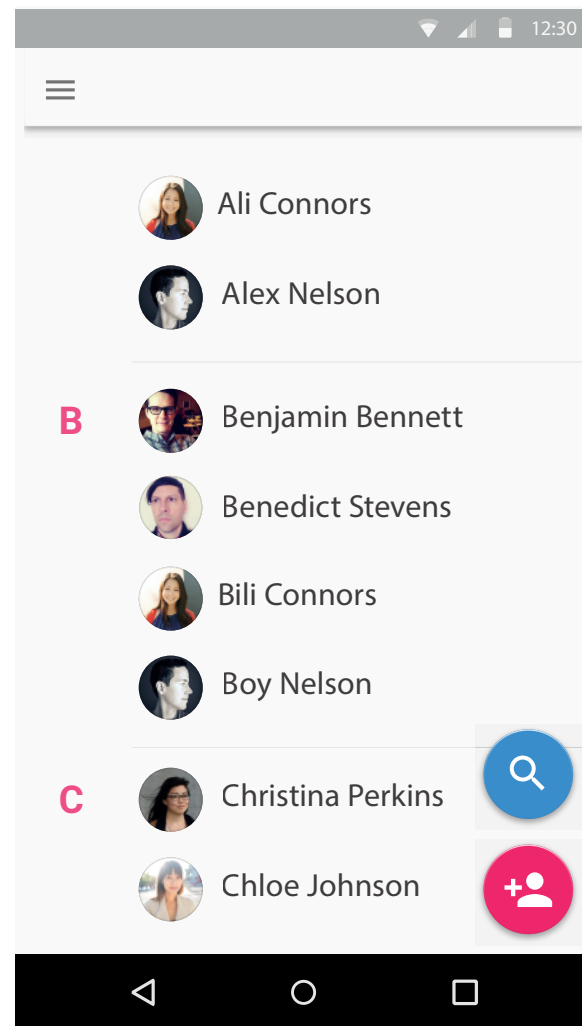

scrolling down the contacts

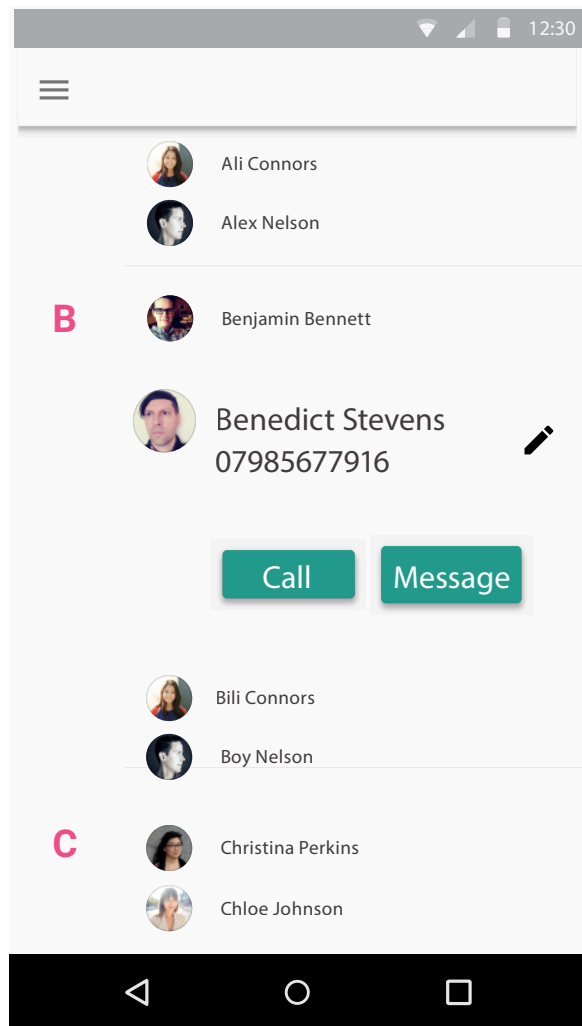

option 1:

pressing the letter of the catalogue the app zooms in the beggining contacts of the letter. in this case **B**

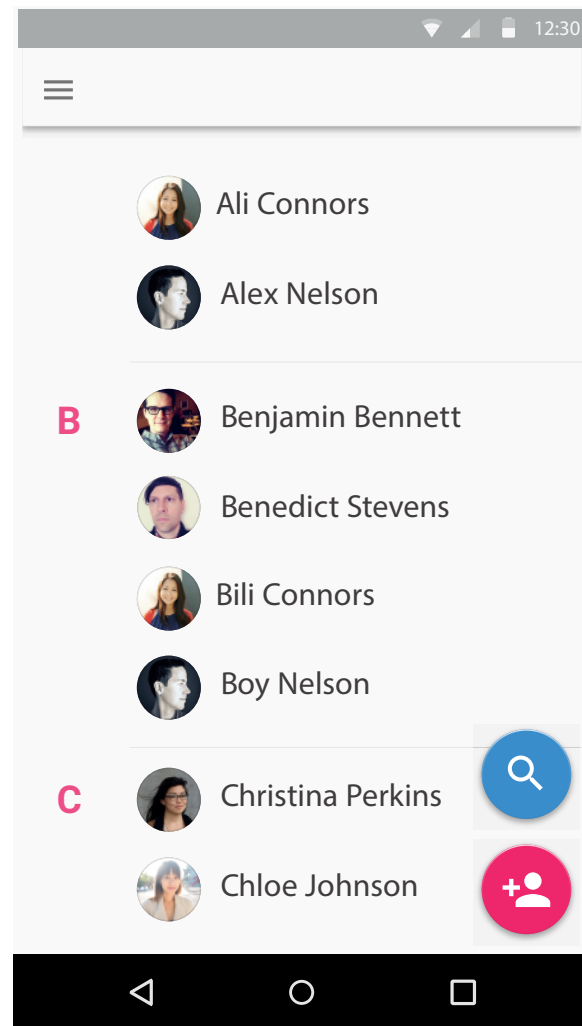

option 2:

pressing on the contacts the screen zooms in the centre of the pressed contact  
In this case: Benedict Stevens

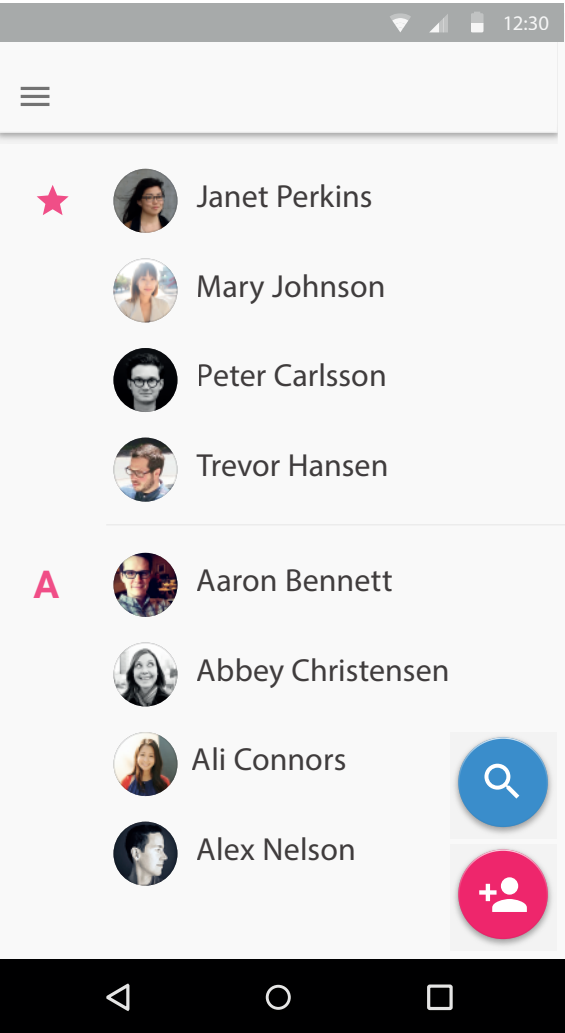

selecting the prefered contact the rest zoom out and under the contact appear two option buttons CALL and MESSAGE as well an edit key on top right of the contact. The buttons are raised buttons compared with the floating buttons the app use for "search" and "add".

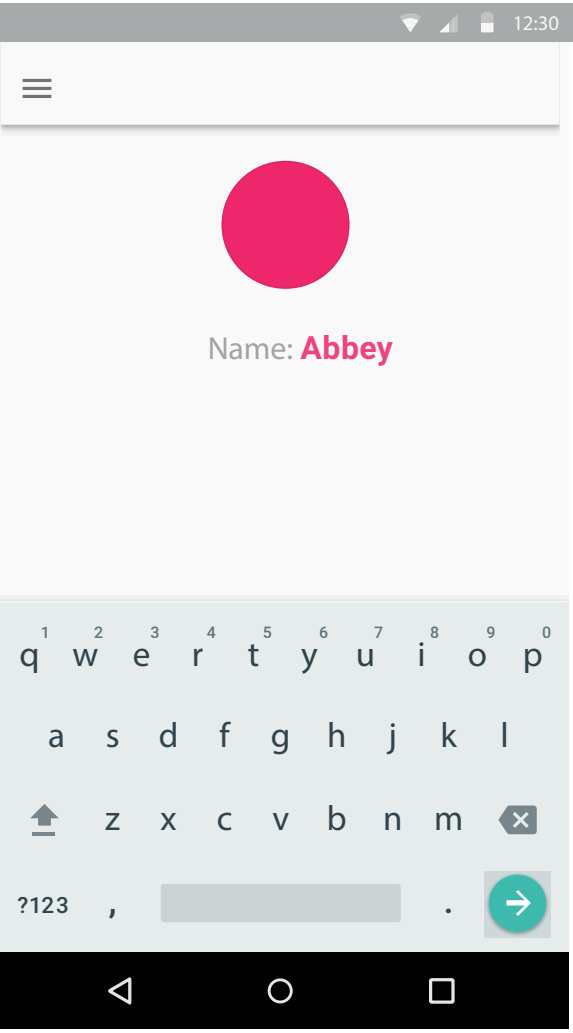

by tapping anywhere else on the screen the app gets on a default view

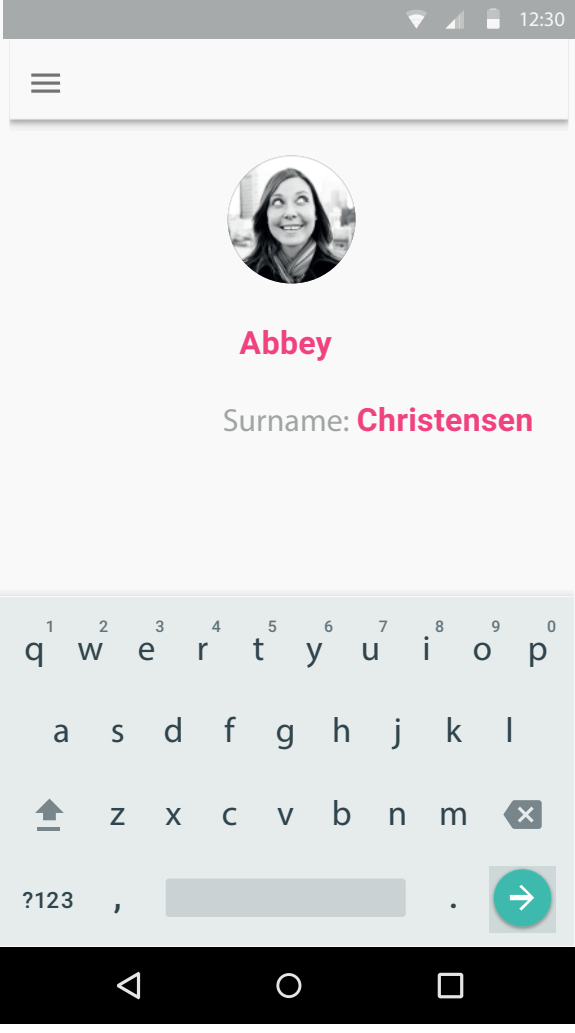

contacts app: add contact

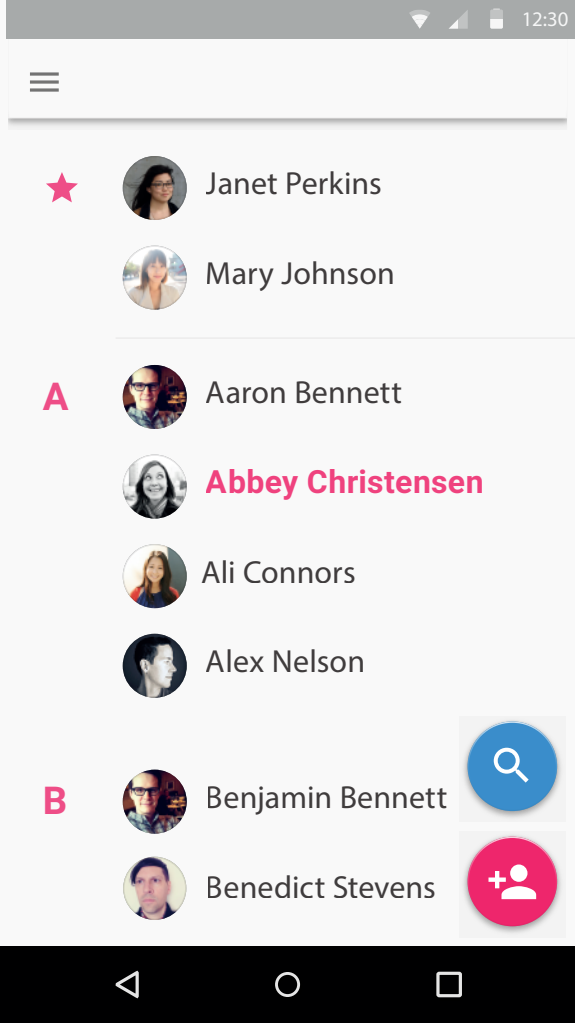

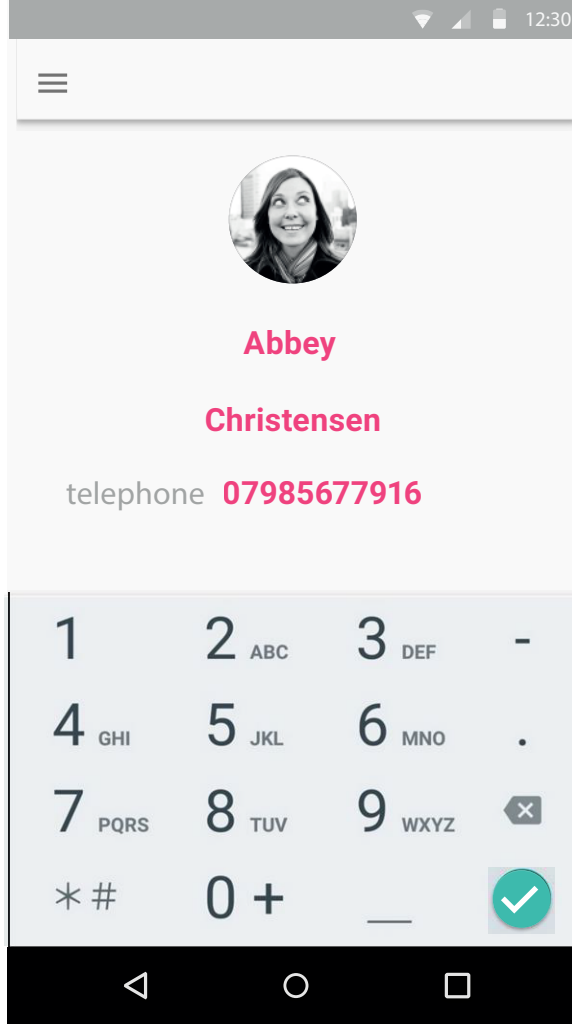

default screen of contacts  
asterisk contacts denote most used and recent contacts

tapping the "add contact" button the app goes in a blank screen with keyboard. The app uses a step by step process to add by default 3 important information: Name, Surname and phone number. more info can be added through the edit key shown before. The process moves forward to the next step by tapping the cyan lower right arrow button "next". By tapping the pink Disk app goes to Camera app to shoot the contact's face

tapping arrow button app moves forward to add the surname.

At the end of the process screen goes on a default view with the recently added contact highlighted.
